Employment Worksite

George Mason University, Office of Research Computing, 4400 University Dr., Fairfax, VA 22030

The Computational Research Specialist will support the Office of Research Computing (ORC) by working with researchers at Mason to integrate computer and information science in their work by educating them on the availability of internal and external cyberinfrastructure resources, investigating new approaches and technologies in computer hardware and software, researching, designing and testing new solutions as they are developed, installing, debugging and maintaining scientific applications, and understanding best use practices needed to take full advantage of the Mason’s High-Performance Computing (HPC) resources. They will also be leading or consulting on data management, data processing and analytics while training users and helping them adapt to the computing resources. They will also be teaching Python, R, Matlab and conducting domain specific (Ecology, Social Sciences, Genomic, Geospatial) tutorials.

Minimum Job Duties for Position

Minimum Job Requirements  Masters in Computer Science, Physics or related field.

Copies of the Labor Condition Application (LCA) will be available for public inspection in the Office of International Programs and Services, SUB 1, Rm. 4318 within one working day after date of filing the Labor Condition Application with US Department of Labor. Complaints alleging misrepresentation of material facts in the Labor Condition Application and/or failure to comply with the terms of the Labor Condition Application may be filed with any office of the Wage and Hour Division of the US Department of Labor.

After posting this notice for 10 days please return this verification form to OIPS.
